One brand for CX, fibre / ISP support & MVNO enablement

Trilogy Digital brings together Trilogy's UK campaign depth and digital/AI capability with 27 years of South African contact-centre scale (100+ clients, 1,000+ specialists, 3M+ interactions/month). All CX, fibre/ISP support, MVNO launch and digital offerings sit under **one accountable brand** — so a connectivity or retail partner gets activations, billing, tech support, outages and branded mobile from a single team.

ONE-LINE FOR THE CEO
We don't only outsource CX for fibre and mobile brands — we help them **run the experience at FNO/ISP scale**, and where needed **launch as an MVNO** on the same stack that keeps subscribers.

QUICK TERMS
CEO glossary — only what matters for this brief

MVNO
Mobile Virtual Network Operator — a brand that sells mobile SIMs/eSIMs using another operator's radio network. Owns the customer; doesn't build towers.

What we offer
Trilogy Digital delivers fibre/ISP & FNO CX (activations, billing, tech, outages), MVNO launch & ops, plus digital/AI contact-centre at UK+SA scale.

FNO / ISP
FNO = Fibre Network Operator (owns the fibre). *ISP* = Internet Service Provider (sells the package to the end user — often via FNO wholesale).

PILLAR 1
Fibre & ISP CX
Activations, router/ONT setup, billing windows, Tier 1–2 tech, outage surge, ISP-partner desks — proven on national FTTH roll-outs.

FNO scale · 24/7 care · Partner support

PILLAR 2
MVNO enablement
Feasibility → wholesale deal → white-label app/portal → billing & provisioning → turnkey ops & CVM. Brands own the relationship; we own plumbing & CX.

<60-day launch · Embedded MVNO · Since 2013

PILLAR 3
Digital CX & AI
Omnichannel care, on-demand surge workforce, WhatsApp/chat commerce, QA & WFM — UK campaign craft with SA delivery economics.

1,000+ specialists · Digital & AI · Owner-led

Connectivity + MVNO — what Trilogy Digital delivers
End-to-end fibre/ISP support and MVNO infrastructure (billing, provisioning, managed ops) so a brand can own the subscriber relationship without building a network — then run activations, care and retention on the same desk.

1M+
Fibre subs supported (Vuma FNO)

< 60 days
White-label mobile app, portal & dashboard

1 — Fibre / ISP care
- Activations & onboarding
- Router / ONT / Wi-Fi tech
- Billing & package changes
- Outage surge & status CX

2 — FNO / wholesale
- End-user + ISP-partner desks
- Escalation to network ops
- SLA care through growth
- Multichannel 24/7 models

3 — MVNO launch
- Feasibility & wholesale deal
- BSS / billing & CRM
- White-label app & portal
- SIM / eSIM provisioning

4 — Operate & grow
- Turnkey MVNO operations
- Revenue assurance
- CVM / churn interventions
- Retention & win-back

THESIS **Embedded MVNOs win** — SIMs inside a bank, retail or digital relationship outperform standalone "mini-telcos." Same logic as fibre wholesale: the brand owns the relationship & data; the enablement partner owns plumbing, compliance and CX at scale.

MARKET INSIGHTS
embedded MVNO thesis · Africa sizing

$4bn
Africa MVNO market · ~6% CAGR to 2031

4.3M SIMs
SA MVNOs end-2023 · +51% YoY · ~R4.3bn value

<1% vs 42%
Africa MVNO share vs Netherlands — headroom

39.6M
Continental MVNO subs toward 2030 · SA/NG/KE/UG ≈ 85%

EMBEDDED MVNOS

The model that actually works
Standalone MVNO play underperforms. Winners wire the SIM into an existing account — banking, retail loyalty or digital — so connectivity deepens LTV, not just ARPU.
- Benchmark vs bank/retail embeds — not vs MNO on price
- Usage data must land in the brand CDP, not a telco silo
- Parent-product job > rebranding airtime

BANKS & RETAIL

Who's already moving
1M+
Capitec Connect SIMs in <1 year

K'nect
Shoprite stacking SIMs at till

FNB Connect (decade+). Retailers now ask how fast the SIM writes into the CDP — not how cheap to launch.

BOARD CHECKLIST

What boards should demand
- Hard-to-copy CVP (content + data, rewards + SIM)
- One partner for CX + regulated MVNO ops
- One desktop for SIM + account + fibre queries
- Watch: payments opening to retailers/telecoms

EXPERIENCE & CASE CHEAT SHEETS

Proof in fibre, ISP & connectivity CX

trilogy

Quick-sheet for CEO / board
FNO · ISP · digital connectivity
Problem → solution → impact

Real delivery for fibre network operators, ISPs and digital connectivity brands — activations, billing peaks, tech support, outages and partner desks at national scale.

Contact-centre pedigree · boutique excellence meets enterprise scale

Voice · chat · email · back office

Tailored approach
Cape Town-based CX depth — personalised attention with enterprise capability under one brand.

Award-winning innovation
Digital infrastructure & AI built in from day one; in-house teams for bespoke AI solutions.

Commercial flexibility
Contracting and costing options traditional BPOs struggle to match — scaled for connectivity.

Industry expertise
Ops, HR, recruitment & training bench delivering top-tier agents for fibre and ISP desks.

Integrated CX
Lifecycle, journey mapping, loyalty & relationship marketing

Digital CX
Conversational AI, digital QA, sentiment & BI

ITSM & S-NOC
24/7 service desk, NOC/SOC monitoring & improvement

CX consulting
Design & build, ops advisory, WFM advisory

BI & analytics · Fully redundant hosted infra · Managed staffing · S-NOC monitoring · AI to deflect · assist · automate — not blindly replace · UK & EMEA time-zone alignment

CAPACITY
~400 seats

Trilogy Digital fields circa **400 seats** delivering **Tier 1 and Tier 2 technical support** across our environment — fibre, router, Wi-Fi and service-desk resolution at FNO/ISP scale.

Tier 1 tech support · Tier 2 tech support

Activations	Billing peaks	Tech support	Outages	ISP partners
New fibre & router onboarding	On-demand surge workforce	Tier 1–2 fibre / Wi-Fi	Rapid-scale status & recovery	FNO wholesale care desks

FNO · FTTH · SINCE 2017

Vuma — supporting 1M customers

24/7 multichannel support for SA's largest fibre network operator and 75+ ISP partners.

1M+ subscribers supported · **24/7** always-on support · **75+** ISP partners supported

WHAT WE DID
- Scaled care through growth to 1M subs
- Residential + ISP-partner support paths
- Activations, tech & service desk

OUTCOMES
- Support kept pace with national FTTH
- ~2M homes connected context
- Long-tenure FNO partnership

TOWNSHIP FIBRE · SINCE 2023

fibertime™ — 83× growth CX

Accessible uncapped fibre at scale — outage recovery and tech support through hyper-growth.

83× growth in 24 months · **330K+** fibertimers supported · **T1–T2** fibre & router tech

WHAT WE DID
- Human-led recovery during outages
- Tier 1–2 fibre, router & Wi-Fi support
- CX model that scales with new networks

OUTCOMES
- 8K → 330K+ active users in 24 months
- Support kept pace with province roll-out
- Trusted partner through hyper-growth

ISP · BILLING SURGE · SINCE 2018

Webafrica — on-demand billing at scale

National ISP billing cycles: high anxiety, volume spikes, zero tolerance for error.

120 billing chat agents · **7–9** day billing window · **Zero** core-team disruption

SOLUTION
- Fully managed on-demand billing chat
- VR, debit orders, suspensions, upgrades
- Real-time WFM + centralised QA

IMPACT
- CSAT protected in peak billing stress
- Fewer escalations & repeat contacts
- Accurate, compliant billing at scale

PATTERN · CONNECTIVITY BRANDS

How we run fibre & ISP desks

The operating model behind Vuma, Webafrica, fibertime and other ISP/FNO partners.

3M+ interactions / month · **100+** enterprise clients · **4** SA delivery sites

PLAYBOOK
- Knowledge-led Tier 1–2 tech resolution
- Surge capacity for outages & billing
- Partner + end-user dual care paths

WHY IT MATTERS
- Wholesale fibre needs partner-ready CX
- Always-on support protects churn
- One brand: CX + MVNO + digital

CEO TAKEAWAY

Trilogy Digital already runs fibre and ISP CX at FNO scale (Vuma, Webafrica, fibertime) with **~400 Tier 1–2 tech seats** — activations, billing, tech and outages — and can **launch embedded MVNOs** on the same stack. One brand, one accountable partner.

Cases: Vuma FNO · fibertime™ · Webafrica billing · Trilogy Digital delivery. Market thesis: embedded MVNOs; Africa MVNO sizing.
