TRILOGY DIGITAL · CEO QUICK SHEET

Our partnership with DSG & CXG — and the MVNO opportunity

trilogy

Commercial in confidence
For internal CEO briefing
Incl. dsg.co.za/market-insights

Trilogy Digital is our purpose-built CX joint venture — Trilogy's UK campaign depth and digital/AI capability paired with **CXG's** 27-year South African contact-centre scale (100+ clients, 1,000+ specialists, 3M+ interactions/month). CXG sits inside **Digital Solutions Group (DSG)**, which also owns the MVNE / Digital Mobile stack — so we can help a brand **launch as an MVNO** and run the CX that keeps subscribers.

ONE-LINE FOR THE CEO
Through DSG/CXG we don't only outsource CX for telcos — we can help a brand **become** the mobile operator, then operate activations, billing, care and CVM on the same stack.

OUR JV
Trilogy Digital

50/50 JV (Trilogy BPO × CXG). Owner-led CX with digital & AI — 1,000+ specialists across SA; flagship Mutual Park, Cape Town.

UK + SA CX · Digital & AI · Owner-led

GROUP · EST. 1998
DSG

Seven specialist businesses, one accountable partner: CX, marketing, telecoms/MVNO, data/AI (Xanite), security, commerce. 60+ enterprise brands · 600+ agents · 3M+ interactions/mo.

28+ years · MVNO launch · MARS · Xanite

JV PARTNER · 27 YRS
CXG

On-demand digital CX across QSR, retail, ISP/fibre, MVNO, banking, entertainment & UCaaS (QContact). Named proof points: Nando's, Vuma, PEPKOR, fibertime, Webafrica, Stellantis.

100+ clients · MVNO CX · 4 SA sites

Mobile MVNO / VMNO capability — what DSG actually delivers

From DSG Connectivity & Telecoms / MVNE (est. 2013, a DSG division): end-to-end MVNO infrastructure, billing, provisioning and managed ops — so a brand can own the mobile relationship without building a network. CXG then runs the CX layer at scale.

< 60 days
Digital Mobile white-label: branded app, portal & dashboard

Since 2013
MVNE enabling branded mobile across Africa

1 Consult & design
- Feasibility & business modelling
- Wholesale / MNO negotiation
- CVP & journey design
- Systems architecture

2 Build & launch
- Network / BSS-OSS integration
- Billing & CRM platform
- White-label app & portal
- SIM / eSIM provisioning (Xanite)

3 Operate & grow
- Turnkey MVNO operations
- MARS revenue assurance
- Logistics & procurement
- CVM / churn interventions

4 CX at scale
- Activations & KYC
- Billing & tech support
- Omnichannel care (QContact)
- Retention & win-back

DSG INSIGHT — **Embedded MVNOs win** — SIMs that sit inside a bank, retail or digital relationship outperform standalone "mini-telcos." Brands own the relationship & data; MVNE owns plumbing & compliance. CX must resolve airtime + account in one interaction.

MARKET INSIGHTS
synthesised from dsg.co.za/market-insights (MVNO cluster)

$4bn
Africa MVNO market · ~6% CAGR to 2031 (Yaron Assabi / MVNE)

4.3M SIMs
SA MVNOs end-2023 · +51% YoY · ~R4.3bn market value

<1% vs 42%
Africa MVNO share vs Netherlands — headroom, not saturation

39.6M
Continental MVNO subs toward 2030 · SA/NG/KE/UG ≈ 85%

SEPT 2026 · EMBEDDED MVNOS
The model that actually works in SA

Standalone MVNO play underperforms. Winners wire the SIM into an existing account — banking, retail loyalty or digital — so connectivity deepens LTV, not just ARPU.

- Benchmark vs Capitec / FNB Connect — not vs Vodacom on price
- Usage data must land in the brand CDP, not a telco silo
- Rebranding airtime ≠ strategy; parent-product

MAY 2026 · BANKS & RETAIL
Who's already moving

1M+
Capitec Connect SIMs in <1 year

K'nect
Shoprite stacking SIMs at till

FNB Connect (decade+), Mr Price / Melon Mobile still sub-scale vs banks. Retailers now ask how fast the SIM writes into the CDP — not how cheap to launch.

SUCCESS FACTORS · SARB OCT 2026
What boards should demand

- Hard-to-copy CVP (e.g. DStv Internet content+data)
- CX + MVNE partner — brand owns relationship; partner owns regulated ops
- One desktop for SIM + rewards + account queries
- Watch: SARB opening payments to retailers/telecoms ~Mar 2027

Top row = published CXG partnership cases (cxg.co.za). Bottom row = Trilogy Corporate Overview SHORT May 2026 (last two slides) — Webafrica & Homechoice.

CXG · QSR · SINCE 2018

Nando's — LTV & wallet share

Centralised ordering contact centre for 300+ restaurants via learn-and-earn model.

R2bn+	75%	98%
revenue delivered	order conversion	answer ratio

WHAT CXG DID

- Continent-first learn-and-earn CC model
- Integrated e-commerce, app & contact-centre orders
- One central point of contact for restaurants

OUTCOMES

- 90%+ calls answered within 20 seconds
- 92% average QA score
- Managers free to focus in-restaurant

CXG · ISP / FNO · SINCE 2017

Vuma — supporting 1M customers

24/7 multichannel support for SA's largest fibre network operator.

1M+	24/7	75+
subscribers supported	always-on support	ISP partners supported

WHAT CXG DID

- Scaled care through Vuma's growth to 1M subs
- Residential + ISP-partner support paths
- Multichannel technical & service desk

OUTCOMES

- Support kept pace with national FTTH roll-out
- ~2M homes connected context nationally
- Trusted long-tenure FNO partnership

TRILOGY DECK · ISP BILLING · ALSO ON CXG SITE

Webafrica — on-demand billing at scale

National ISP billing cycles: high anxiety, volume spikes, zero tolerance for error.

120	7–9	Zero
billing chat agents	day billing window	core-team disruption

SOLUTION

- Fully managed on-demand billing chat workforce
- VR, debit orders, suspensions, premium extractions
- Real-time WFM + centralised QA / escalations

IMPACT

- CSAT protected in peak billing stress
- Fewer escalations & repeat contacts
- Accurate, compliant billing at scale

TRILOGY DECK · RETAIL CHAT COMMERCE

Homechoice — Facebook to WhatsApp sales

Couldn't convert Facebook ad interest into real-time sales outside working hours.

+R1m+	91%	+50%
revenue / month	WhatsApp adoption	customer compliments

SOLUTION

- Facebook prospect → WhatsApp instantly
- Continuous buyer contact beyond CC hours
- Seamless always-on buying path

BENEFITS

- Revenue up > R1,000,000 per month
- Improved customer satisfaction
- 91% WhatsApp adoption; +50% compliments

CEO TAKEAWAY

DSG's own research says **embedded MVNOs** (bank/retail/digital) are the SA model that works — and Africa is still <1% penetrated vs mature markets. **CXG proves we can run the CX** (Nando's, Vuma, Webafrica). **DSG/MVNE builds the stack**. Trilogy Digital is the partner that can pitch *launch branded mobile + operate the experience*.
